

**Stay home when you are ill.** Those individuals who test positive for Coronavirus should self-quarantine for a minimum of 14 days.

A "Fever/Respiratory" Tent has been set up by the CRMC Emergency Room and will be open from 8:00 a.m. to 8:00 p.m. seven days per week beginning Thursday, March 19, 2020. Any patient 16 years and older exhibiting fever and/or respiratory issues should present to this tent for screening, rather than to one of CRMC's satellite clinics. Children younger than 16 may go to a satellite clinic for screening. Questions may be called to 816.649.3260.

- ▶ Effective immediately, and until further notice, only CRMC's Emergency Room Ambulance entrance and the adjacent Outpatient Clinic I entrance will be open/unlocked.
- ▶ Anyone entering the building through OP Clinic I will have his/her temperature taken. If positive (100° or more), he/she will be sent to the Fever/Respiratory Tent for screening, or home for self-quarantine.
- ▶ Dialysis patients will still enter CRMC in their usual manner, and a staff member will escort them to Dialysis.
- ▶ The Ambassador program has been suspended, and all student training programs have been suspended.
- ▶ Meals on Wheels will be delivered to the door only.
- ▶ No visitors will be allowed within CRMC unless they are screened for fever first.
- ▶ Minor patients shall have one parent present at a time.
- ▶ No meetings involving outside entities will be scheduled at CRMC, and no sales representatives will be allowed.
- ▶ There will be a mandatory 14-day quarantine for CRMC employees who have traveled abroad or to one of the U.S. "hot spots." A moratorium has now been placed on employee travel.
- ▶ Patients who call a satellite clinic with the potential for Covid-19 will be evaluated over the phone and quarantined at home unless the provider deems otherwise.
- ▶ All satellite clinic doors will be locked. Patients will be seen by appointment only and screened at the entrance.
- ▶ After-Hours Care at Walnut Medical Clinic will be limited to appointments only --- no walk-ins. Appointments should be made for non-fever, non-respiratory issues only, unless the patient is 15 years old or younger.
